

Wind Power

(The Herculous Song)

Look to the skies
See the mountain that seems to fly by?
Hard to believe
That this creature was once built for speed!

So you may ask
How did something
so large fly so fast?
Far in the past
It was blessed with
the power to blast!

For he's a Herculous bird
And though it sounds quite absurd
They were the first wind powered heroes
They blew off like a rocket
The fastest things that ever flew!

Lord of the skies
There's no others could fly quite so high
But oh don't you know
In hot weather they all would explode!

For he's a Herculous bird
And though it sounds quite absurd
High in the sun these wind powered heroes
They blew up like a rocket
The vastest blasts that ever blew!

So much for Supa Nova
Behold the biggest bang that ever blew!

Cretaceous mass extinctions
Weren't due to cosmic frictions
But spontaneous combustions
Of Herculous proportions
Oh Yer!

So this mighty flying sumo
Now flies our skies in solo
A spent wind powered hero
Last Herculous to zero
Oh Yer!
